

# DECEMBER PROMOTION

Buy a 6 Session Laser Therapy Package, get one individual session FREE!

## What are the benefits of laser therapy?

- Reduced pain
- Reduced inflammation
- Accelerated tissue repair and cell growth
- Promotes healing

Cold, damp weather causes arthritic joints to stiffen up at a time when our dogs naturally become less active. This “double whammy” leads to an increase in pain-related symptoms such as slowness on walks, trouble getting up or lying down, difficulty navigating stairs or hopping into the car, limping, lack of interest in exercise – even depression and changes in behavior.
